Name: Lee Zheng Ting

Student ID: 33522219

Lab: Friday 1pm – 3pm

Tutor: Dr. Grace

Domain of the visualization: Annual Number of Marriages by States in Malaysia.

https://github.com/ZhengTingLee/3179.git

Dataset Details:

- Attributes: Categorical, Ordinal and Quantitative Data.
- Source:
    o Annual Marriage by State - https://data.gov.my/data-catalogue/marriages_state_age
    o Map (GeoJSON) - https://simplemaps.com/gis/country/my#admin1
- Source & Author: Government of Malaysia and simplemap
- Due to time constraint, only the year 2022 results is shown in the current map. No normalization was applied in this version.
- I chose the choropleth map as it focuses on the regional variation and spatial distribution of annual marriage among the states in Malaysia.
- I did not choose the proportional symbol or dot map as the values were based on the states, and not by a certain place or an individual event.

Annual Marriage by states in Malaysia

Annual Marriage by states in Malaysia from year 2017 to 2022
Currently only year 2022(Further details have not been added)
